

Notice from Hong Kong Schedule Coordination Office regarding GABA Night and Ad-hoc Slots

1. With a view to optimize utilization of runway capacity with reference to paragraph 16 of the [Schedule Coordination Guidelines for Hong Kong International Airport](#), six night slots for operations between 1600-2059 UTC are made available daily for those aircraft types not currently listed in Annex 3 of Schedule Coordination Guidelines ("The Guidelines") since 08 October 2018. OCS users may apply for the above-mentioned runway slots using OCS instant confirmation procedures as stipulated in "[Guidelines on Slot Application for General Aviation/Business Aviation at the Hong Kong International Airport](#)" with effect from 0000 UTC on 23 September 2019.
2. In addition, to further maximize the utilization of last minute cancelled slots outside the night period by commercial services, slot requests for GABA operations may be considered from time to time depending on availability of various capacity constraints.
3. Application procedures for the slots mentioned in paragraph 2:
 - a) OCS users may apply for runway slots within two calendar days from the day of application.
 - b) Consistent with the instant confirmation procedures of slot application via OCS, application via "Ask Us" function are processed principally on a first-come, first-served basis. A General Aviation Clearance Response (GCR) will be issued to the OCS registered email address only when a runway slot is conditionally approved.
 - c) On receipt of the GCR, OCS users should proceed with booking of parking stand and HKBAC ground handling services as per "[Guidelines on Slot Application for General Aviation/Business Aviation at the Hong Kong International Airport](#)" paragraph 2.3. **Failure to do so will result in the runway slot being cancelled.**
 - d) GCR allocated runway slot is not editable in OCS. OCS users are required to cancel any confirmed runway slot and parking stand booking not to be used through the Business Aviation Parking Management System (BAPS) managed by the Airport Authority as soon as possible.
 - e) All submitted runway slot requests without any offer will **expire at 2359 UTC every day** and if a slot is still required, a new request should be submitted from 0000 UTC the next day.
4. All relevant provisions and the "Penalty Scheme on Slot Misuses" in the "[Guidelines on Slot Application for General Aviation/Business Aviation at the Hong Kong International Airport](#)" are applicable to GCR allocated slots.
5. To safeguard the system integrity of OCS, accounts of OCS users which are found to have abusive or spamming behaviour will be terminated with prior notice.

18 September 2019

6. The above application procedures are on a trial and temporary basis and are subject to continuous review jointly by AA and HKSCO and will remain in effect until 2359 UTC on 31 March 2020.

Special Note: As many of you are aware, OCS has experienced intermittent service disruptions since 8 September 2017 due to system overload. OCS users are advised to ONLY submit slot requests via "Ask Us" for operations as per the provision in paragraph 2 within the timeframe as specified in paragraph 3a) to avoid system overload. Failure to do so may result in further service disruptions on OCS which may affect our ability to continue with the above arrangements.

7. The Notice from Hong Kong Schedule Coordination Office regarding Night and Ad-hoc Slots (dated 15 Mar 2019) issued on 15 March 2019 is hereby superseded.

18 September 2019

ST text

Once a request has been submitted the response screen displays whether the slot can be conditionally approved.

If the requested slot cannot be conditionally approved and no offer can be made, the request response displays the details, the reason code, SSIM code 'U' and a drop down menu to select "Cancel" or "Ask us". Select "Ask us" and click "Commit" to submit your request to HKSCO for consideration.
